Education

D Y Patil University, Pune

Dec 2021 – Jun 2025

B.Tech in Computer Science & Engineering

Grade – 9.20 CGPA

Work Experience

Open Source Contributor – Freelance

June 2026 – Present

Software Developer – Freelance

Mar 2024 – June 2026

Projects

[Paytm Safar - AI Loan Copilot for Small Merchants](#)

Built for Paytm's "Build for India" AI Hackathon designed a voice first, multilingual AI copilot that makes small merchant lending transparent and trustworthy by explaining loan terms in plain language while keeping actual credit decisions rule-based and compliant.

[GatiAI - Supply Chain Disruption RL Environment](#)

Built GatiAI, an OpenEnv based RL training environment simulating Indian supply chain disruptions (supplier failures, port congestion, multi vendor crises) with a novel multi dimensional reward function (accuracy, cost, speed, risk, explanation quality). Implemented FastAPI REST server, evaluation harness, and TRL/GRPO training integration deployed on Hugging Face Spaces via Docker.

[AuraAI](#)

Built AuraAI, a provider-agnostic AI studio (text/image/video/audio) with a React and TypeScript frontend and FastAPI backend. Designed a pluggable provider abstraction layer supporting multiple AI providers (OpenAI, Gemini, Anthropic, Stability AI, ElevenLabs) with automatic fallback, and containerized the stack with Docker Compose.

Achievements

[Codeforces](#): Expert (Rating: 1869)

[AtCoder](#): 4 Kyu (Rating 1307) Top 6.85% globally

[LeetCode](#): 500+ problems solved

Skills

Programming Languages : Python, C++, C, SQL

Software Engineering : System Design, Software Development Life Cycle (SDLC), Design, Development, Testing, RESTful APIs.

Tools: Git, Docker, CI/CD.

Machine Learning / AI : PyTorch, NumPy, Pandas, torchvision, Hugging Face Transformers, LLM
